S0495-1

ARIZONA LIBRARIES

1982/1983

STATISTICAL REPORT AND DIRECTORY

compiled by the

DEPARTMENT of LIBRARY, ARCHIVES and PUBLIC RECORDS
State Capitol
1700 West Washington
Phoenix, Arizona 85007

Sharon G. Womack, Director

Sandra S. Nelson, Editor

EDITOR'S NOTES

1. The population figures used for public libraries in this report were taken from the 1980 Revised Census unless an asterisk (*) follows the figure. The population figures for communities too small to be counted in the census are indicated by an asterisk (*) and the figures given are estimates of the 1980 population made by the appropriate Arizona Regional Council of Government.

2. The population figures given for each county include the populations of the cities in the county in which there are public libraries. The figure given after the county name reflects the population of the county residing in areas unserved by any local public library. Because it is the responsibility of the County Library to provide public library service to the areas unserved by a local public library, the per capita figures for the County Libraries have been calculated using the total of the unserved population plus the population of the city in which the County Library is located.

3. The population figures for institutional libraries reflect the population of the institutions at the time the survey questionnaire was completed.

4. Although not all County Libraries use the exact same criteria to designate Deposit Libraries certain similarities occur. For the most part, Deposit Libraries are open less than fifteen hours per week, have no budget, no paid staff and provide no services other than book circulation. Deposit Libraries are included in the directory portion of this report and indicated by **(DC)**. No statistics for Deposit Libraries have been included in the statistical portion of this report.

5. A new table has been added to this report this year. The table presents comparative data pertaining to the fourteen County Libraries and the five Metropolitan Libraries in a single easily accessible format. Complete statistics for these libraries have also been included in the regular statistical tables of the report.

6. Circulation figures given in the 1981/1982 Statistical Report and Directory included "in-house" circulation. Although these figures have been reported in the survey questionnaire for a number of years, they had never before been included in the circulation figures reported in the statistical segment of this report. The inclusion of these "in-house" figures caused a number of problems for persons interested in comparing circulation growth over a period of years. Therefore, "in-house" circulation has not been included in the circulation figures reported in this document. Anyone who needs corrected circulation figures for 1981/1982, can send a written request to the editor of this report.

7. The survey questionnaire used to collect data for the Statistical Report and Directory includes questions which are not tabulated and printed in the report. This additional data includes information on library boards, personnel policies, benefits and salaries, bookmobile stops, library location, periodical and newspaper holdings, and in-house circulation. For more information on this additional data, please send a written request to the editor of this report.

8. Information in the directory section of this report is accurate as of October 15, 1983. Changes made after that date are not reflected in the directory.
